

## Automatic condensate water drain pipe

### Patent NO.:01245222.X

The waterspout of this product at the up way, and a light ball sealed well with the waterspout under the negative pressure of AHU (air handling unit). When the condensate pan water level higher than the waterspout, the light ball open from the waterspout at the pressure of condensate water and the condensate water will drain out from the waterspout.

This trap drain the condensate water from the AHU to out way

This trap prevent out air enter to door effectively and prove good air quality of indoor. So it can extend HEPA use-life effectively.
